EXTRA CENSUS BULLETIN.

No. 6.

WASHINGTON, D. C.

July 6, 1891.

INSURANCE BUSINESS IN THE UNITED STATES.

ALABAMA, ALASKA, ARIZONA, ARKANSAS, CALIFORNIA, COLORADO, CONNECTICUT,
DAKOTA (NORTH AND SOUTH), DELAWARE, DISTRICT OF COLUMBIA,
AND FLORIDA.

DEPARTMENT OF THE INTERIOR,

CENSUS OFFICE,

WASHINGTON, D. C., June 17, 1891.

SIR:

The wide range which the insurance business of the United States has attained since the Tenth Census fully demonstrates that the subject should be given fuller and more comprehensive attention in the Eleventh Census than it has before received. The importance of a complete record of the insurance business transacted in each state during a sufficient length of time to enable reliable deductions to be made therefrom, as well as to have this subject treated in uniformity with the other special inquiries made by the Eleventh Census, led to the collecting of the statistics of insurance in each state and territory for the ten years beginning January 1, 1880, and ending December 31, 1889.

To obtain a foundation for this work blanks of inquiry were sent to 60,000 postmasters; a voluminous correspondence was had with the insurance officials of all the states and territories; 310 reports of the state insurance departments were examined, and a careful and exhaustive research was made through more than a thousand insurance journals and other publications. By this means a list was secured of 2,400 fire, ocean marine, inland navigation and transportation, and tornado insurance companies, 4,564 life and accident companies doing business on the "old line" or assessment plan, of which 3,064 are now engaged in active business, and 1,500 ceased to transact business during the decade; also a large number of companies doing a miscellaneous business.

That the information received may reach the public at the earliest date possible it will be published in a series of bulletins. These bulletins will show the fire, ocean marine, inland navigation and transportation, tornado, life, accident, casualty, plate glass, and other kinds of insurance business as they are found in the respective states and territories. The present bulletin embraces the fire, ocean marine, inland navigation and transportation, and tornado business in the eleven states and territories above named.

The tabulations have been prepared under the direction of Mr. CHARLES A. JENNEY, special agent of the Census Office in charge of insurance.

Very respectfully,

ROBERT P. PORTER,

Superintendent of Census.

The SECRETARY OF THE INTERIOR.

INSURANCE BUSINESS IN THE UNITED STATES.

BY CHARLES A. JENNEY.

The states of Alabama, Arkansas, California, Colorado, Connecticut, Delaware, Florida, and the territories of Alaska, Arizona, Dakota, and the District of Columbia form the group given in this bulletin, being the first of a series on the insurance business in the United States. The statistics given are for ten years, and show the fire, ocean marine, and inland navigation and transportation insurance business transacted from January 1, 1880, to December 31, 1889, with the exception of the business of a few companies retired during the early years of the decade, the aggregate business of which would not be of sufficient amount to change the general results.

The comparatively recent beginning of the insurance business in Alaska allows but a small experience for the companies in that territory, the business up to December 31, 1889, being confined exclusively to insurance against losses by fire.

The following classification has been made of companies doing a fire, ocean marine, inland navigation and transportation, and tornado insurance business: (a)

CLASS 1.—Companies having a joint stock capital, and doing either a fire, fire marine, ocean marine, inland navigation and transportation, or a tornado business.

CLASS 2.—Companies having a guaranty capital, and doing either a fire, fire marine, ocean marine, inland navigation and transportation, or a tornado business.

CLASS 3 a.—Companies doing business on the mutual plan and insuring only manufacturing property.

CLASS 3 a.—Companies doing business on the mutual plan and insuring only ocean marine risks.

CLASS 4.—Companies doing business on the mutual plan and insuring all kinds of property.

CLASS 5.—Companies doing business on the mutual plan and insuring only dwellings and contents and farm property.

ALABAMA.
